LABORATORY TEST REPORT

Regn Date	: 22/10/2020 17:01	Sample Collection	: 22/10/2020 19:23
Name	: MR. DEEKONDA SHREENIVAS	Print Date	: 23/10/2020 18:09
Regn No	: 1220107303	Age / Sex	: 77 Years / Male
Ref By	: Dr. CGHS ON PAYMENT	Regn Centre	: Dilsukhnagar - 12
Sample Type	: None	Ref no.	:

CYTOPATHOLOGY REPORT (FLUID FOR CYTOLOGY)

Cyto No. 626 / C-20 / 7303

Clinical details : Ascitis with peritoneal thickening.
K/C/O Mycosis Fungoides (Status-post treatment)

Nature of Specimen : U/S guided ascitis fluid tap for cytological evaluation

Gross : Ascitis fluid aspirate

Colour - Yellow

Volume - 40 ml

Clots - Absent

Sediment - Present.

No of smears prepared - 06

Stains employed : H&E - 02, PAP - 02, MGG - 02

Microscopic Examination :

Cellular smears revealing abundant histiocytes forming aggregates & singly scattered forms admixed with numerous reactive mesothelial cells, small mature lymphocytes & polymorphs. Background appears proteinaceous. Negative for atypical cells in the smears studied

Impression :

Suggestive of Peritoneal effusion with **nodular histiocytic / mesothelial Hyperplasia**

Possibly a non-specific chronic inflammatory reaction process.

Advised clinical & Cell block morphological correlation with IHC studies for a conclusive opinion.
